Com. Mutakha Kangu: Mr. Ole Paulo. The Senate should it be located in Nairobi or shall we put it anywhere? I am asking this from the fact that currently we have everything headquarters in Nairobi and that has its own economic implication?

Joseph Ole Paulo: It might be necessary for us to develop a Senate elsewhere. May be rotating from place to place. Mombasa, Nakuru or something like that.

Com. Kavetsa Adagala: Asante sana Mr. Ole Paulo. I would like to ask you a couple of things. One of them is education everybody is starting at primary school and going to secondary but there is a two year period before primary 2 or 3 year period which for instance if the Government say all the children of Masai aged between 3 and 5 must go to school in January as a part of Affirmative it will change Masai life forever because early child hood education is vital. I am wondering whether we should have a consideration of that?

I have another question when you pin yourself to a certain number in the Senate and you say the 42 ethnic group. You know we say about 42 and say others and that is very bureaucratic because bureaucracy as you know does not want to deal with so many details. Some tribes in Tana River say they are distinct group only that they are small so when we say 42 we should know that these other people are there and in democracy they want to be recognized. The Senate might be a lot bigger then you have figured here. Tribes like Luya will say they are 18 different ethnic groups. Maragoli will say they are not Luhyas.

When you say Ombudsman. Is there an equivalent in a Ki-masai. Someone somewhere where people will go with grievances when they had nowhere else to turn. Someone who will be neutral. This is a Swedish word from a Swedish tradition. What is there in the Masai traditional as we draw it up we will know what kind of a person is he and what can he do for Kenyans. We can get it from there other than getting it from the laws?

Joseph Ole Paulo: On pre-primary education. It was my assumption that when we talk about education up to form four level we do not exclude the nursery level we should start from there going up I do agree that nursery level is equally important in terms of formation of ideas etc.

Secondly on the number of Senate Act ideally it is the principal that is important that we get represented of course when you go to the actual number we have only history telling us that when we started as a Nation we had 42 well recognized ethnic groups and is where we are basing that number. That does not stop the Ali-molo from saying I was left out this applies to Bajuni that can be an open ended issue which Kenyans should agree upon.

The Ombudsman. We had elders, well known elder in every location where if you disagree you went to the Chief and say you want a meeting so that elders can come in here. This is an idea that is supposed to be national than local.

Com. Kavetsa Adagala: Tell me the name of an elder in Ki-masai and traditional Chief in Ki-masai?

Joseph Ole Paulo: Oloiguenani is the Chief. Ilpayiani kituak are the elders.

Com. Kavetsa Adagala: We need to get from our roots because if we come with a word and people cannot even pronounce it and is put on top of them. If they see quality from there own they can take it easier. Thank you very much.

That is a Constitutional right the right to associate and you are saying with the political parties that right should be limited. How do new political parties come up? How do small parties grow up? You are asking the Constitution to dictate. Many people are coming up with this suggestion but they are not telling us how we can reduce them. If you say the registration fee be raised up some people can run even 5 parties with there own resources. I do not know what you mean by saying that citizenship should even be by buying?

Bolga: This is to provide for people who may want to bring resources to the country, who are rich and want to come to the country and invest. Several countries in the world requires that in order for you to be taken as a citizen of that country you have a minimum amount of money you are willing to transfer to that country say 15 million Kenya shilling. This is particularly to bring in economic resources.

Com. Kavetsa Adagala: You are aware that there are people who can buy Kenya several times over. You better find out and know what that buying in means. It cannot just be money and you are bringing in money it has to be something more.

Translator: (inaudible)

Bolga: I am just mentioning the major areas, which I feel can be considered and that is not the only one. I am only giving a view. After all why not legalize it because Indians have been buying their citizenship in a way in this country.

Com. Kavetsa Adagala: The other thing which I think it is important is that if we have elected a MP here in Kajiado Central then he goes to Parliament and his party does not have 30 MPs then you nullify all that. You have taken away our rights to choose our MP.

Translator:*nikioru naa taata haki iltunganak*(inaudible)

Bolga: I suggested a solution to that it should be given a period of time so that he can consult with his constituents and amalgamate with a party which is closer to the views of the people. This is to avoid having more parties, which end up doing nothing.

Com. Kavetsa Adagala: Okey I see what you are to do. The last one is that. Materials, which can confuse children. We are going on into a very democratic period and teachers have been saying that someone else can confuse children. It is going to

be a very open society and a child can sort information from anywhere. So what do you mean by confuse?

Bolga: I am a history teacher; there are books in the market, which have been written with a biased theme. They don't speak the facts that are known to the people e.g. you can bring in the idea and say Prof. Saitoti is the MP for Kajiado Central between that time and this. The children were not there and they believe such information because of the sub-standard books.

Com. Mutakha Kangu: So you are saying that there are some people who would want to policy history. We need a history that can give the Kenyan children the true picture of what happened.

The question of the mixture, between Federalism and Republicanism. You are trying to refer to the American system as many have said that it is democratic but it is not pure democracy. The Americans mix Democracy with Republicanism and Federalism is one of the mechanisms of mixing the two. Now I would like to know if you are referring to the American System how does the idea of a Prime Minister sit in with this mixture for democracy and Publicans?

Bolga: The purpose of a Prime Minister is to share powers with the Executive President which can be misused in a country like Kenya where many people are not fast with their democratic principals, human rights. Certain thing to be defined that so and so is doing it but not so and so. This will stop one of them from becoming so powerful. The American democracy has what we call political hooliganism.

Com. Mutakha Kangu: The question is the Americans have been able to control the President without necessarily creating another office called Prime Minister. If we are borrowing the American Republicanism why don't we find out what is it they do that has enabled them to have a President that is not powerful without the office of the Prime Minister?

Bolga: In my opinion: the Americans have a senate. I have not found it wise to create a Senate that is why I have not included it and so I have created more powers with Parliament with Prime Minister and the institution of society which they can check the misuse of powers check and balances. You can even go to court and say I have opposed this.

Com. Mutakha Kangu: I have got that point. On Citizenship you say that Citizenship can be acquired through marriage. Currently the Constitution allows husbands to pass citizenship to wives, and it does not allow wives to pass citizenship to their husbands even where it allows husbands very many people along the borders are complaining that the mechanism or the procedures are so complex that people live with wives for 20, 30 years because they have been recognized as the citizens before they get ID in this case they cannot vote or be employed. Do you have any thought on how we can hasten this process many people would think of a Kenyan woman getting married to some German or American but the truth is that for the communities that live along the border this is a day to day affair. They are marrying across the borders and so on how do we hasten?

How do we also control certain incidents like we reach election and some politicians go and correct so many girls and present them as wives of this constituency they just get votes and then after election they go back?

The other question is we have many systems of marriage. For those who go to church or go to District Registry at the end of the ceremony they are declared husband and wife. So you know this is a wife and this is a husband but many of the Kenyans marries through the traditional system, which is a process. It is not something you declare in one day it take a long process. At what point do you know that this one has become so and so wife so that the right can flow?

Finally on that issue of citizenship, you said others could become citizens through application we need some thoughts on the conditions they should fulfill. If you ask this Masai they will tell you that most African communities had there own way of bringing in an outsider and expecting him as one of thee own and that person had to perform certain rituals and so on. The Americans will tell you that you must be of a certain age. If you are too old they are looking for labour they cannot accept people beyond a certain age or educated to a certain level. What conditions do we put?

Bolga: My views, which I have presented to you on this matter. I have talked about abuse and misuse. There some cases where you go take a wife or husband just to get citizenship. After two three months there she is gone. What I mean with federal aspect I mean that local ideas traditional will be referred in various things. The indigenous people will choose the conditions to be applied for one to become a citizen. We have Christians oriented. We have traditional which is dying we have Musilimu orientation we have those who will want the Western or modern so suggesting just one thing will not work here. We are saying on the principals that will legend enough to prevent the abuse and also to protect the Kenyans where they are denied their rights of marrying anybody they want.

Grace Supeyo: Ya tatu ni juu ya uajiri wa kazi. Ukifika hapa Kajiado kwa office utakuta watu wa hapa Kajiado ni wachache sana. Kwa hivo tungependa watoto wetu wenye wamesoma na ni wa Kajiado district wapeye nafasi, wawe wanandikwa kwa hizo offisi.

Grace Supeyo: Ya inne ni wafanye kazi wa Serikali wengi wao hawajatoka katika wilaya yetu ya Kajiado. Wametoka inje ya Kajiado na mara nyingi hawatufanyee kazi ya kuridhisha. Kwa mfano mahali kama hospitali ame wenye kusimamia mambo ya ardhi na survey vitu kama hizo tunashinda nyingi sana. Kwa hivo tunapendenza watoto wetu wawenze kuandikwa kazi.

Tuna Rural Development. Utakuta ya kwamba Kajiado district tumeachwa nyuma sana. Kitu kama maji yenye inafika hapa ni kidogo na kwa hivo watu wa hapa wanaumia sana. Barabara vile vile ni baya. Tunaomba Serikali iwenze kutupatia vitu kama hizo.

Kuna sehemu ambazo tuna wanyama. Katika sehemu hizo watu wetu wanauliwa na hakuna malipo. Tunaulenza Serikali iwe inasaidia watu kama hawa kwa kuwalipa. Na malipo iwe nzuri maanake maisha ya mtu ni ya dhamana sana kuliko ya munyama.

Usawa wa wake kwa waume. Katika district yetu tunaona ya kwamba mtoto wa musichana anaumizwa sana. Tungeomba kuwe ni lazime musichana kusomeshwa na awe na haki ya kuolewa na mtu mwenye anataka. Na tungetaka musichane awe anaridhi kama muvulana. Pia mali ya mume na mke wakati wakugawa ziwe ni sawa. Kusiwe kwamba mama atanyimwa. Mke awe na haki ya kuridhi mume wake.

Jambo lingine ni juu ya customary marriage. Kuolewa kwa kienyenji ama kimila na hii haina certificate. Kwa hivo ningeomba tuwe tunapatiwa certificate na kwa njia hiyo wamama watawenza kufaidika. Pia ningependenze Title Dead iwe inaadikwa jina la mama na mzee kwa sababu tunashind nyingi ya mashamba. Wamama ugutuka tu shamba limeisha bila ye ye kujua.

Kama ni bibi moja ni sawa kama ni wengi wote majin yao iwe hapo yani kwa Title Dead.

Hospitali: Naomba matibabu iwe ya bure. Watu wetu wengi uwa wakifa kwa sababu ya shinda. Unapo enda hospitali lazima ulipe na pengine hauna pesa.

Tungependekenza pia KMC ifunguliwe kwa sababu ya wakulima wetu. Sisi na watu wa mifugo na kwa hivo tukipata KMC tutafaidika.

Com. Keriako Tobiko: Jaribu kumalinzia sasa.

Grace Supeyo: Namalinzia. Pia ningependekenza wale Wabunge, watu ambao tunawachagua ata Rais wawe ni watu wenye wameoa. Mtu mwenye mke na familia yake. Asizidi umri wa miaka 70 na awe ni mtu mwenye anajulikana kwa kitabia. Yaani awe ni mtu wa tabia nzuri.

Mashamba: mashamba yetu hapa Kajiado iwe inatawaliwa na community ama watu wa area hiyo. Kwa njia hiyo tutazuia usagi wa mashamba ambao umezidi. Hivi ni kusema kwamba mtu akitaka kunza lazima community ijuwe ni kwa nini anauza. Na kwa njia hiyo tutazuia na vizazi vyetu hazitakosa mahali pa kuishi.

La mwisho nitazungumzia juu ya Wabunge. Wabunge wanapo chaguliwa wawe namasomo kiwako fulani ndiyo wawenze kuchaguliwa.

Interjection:

Grace Supeyo: Kiwako cha kidato cha inne. Pia ningependekenza wanapochaguliwa kuwa Ministers wapewe kulikana na masomo. Kama ni mambo ya economy ipatiwe Mbunge economist. Mambo ya afya vile vile mtu mwenye amesomea kazi ya udakitari ndivyo Ministerial post zilikane na masomo. Asanteni sana.

Grace Supeyo: Nafikiri ata hapo tungeongezea ni kwa vile economy ya nchi yetu labuda Serikali itasema haitawenza kupeyana masomo ya bure kwa kila njia lakin kama ingewezekana. Pendekenzo langu ni kwamba ikiwezekana kutoka nusery mpaka secondary mzazi angaganiye university na college.

John Keen: Nasikitika nawaonia huruma sana. Nilabia Lannola juzi pole Mr. You are in trouble. Quite honestly Mr. Chairman it took us six weeks at the Lancaster House Conference to come up with this Constitution. We were meeting sometime upto 2.00am. I know what is wrong. You can only take the 1962 document and go through it the biggest problem here is State House, Harambee House Presidency. Hapo ndipo pako na kisirani kubwa. Mukituondolia hiyo basi tutamlina.

Com. Mutakha Kangu: Muheshimwa Thank you very much. We understand the need for the Kenyans to have a Constitution quickly. We understand the Lancaster Consultation took a short time to make but as you say. We are a people who have been put in a very difficult position by the Kenyans. The Kenyans fought very hard to have this process they eventually agreed on how it should be done and reduced that agreement into an Act of Parliament which we are suppose to follow. We are saying that one of the problems the Kenyans are crying about is that we make laws but we do not want to observe those laws.

Now the Act of Parliament we have says that if we finish taking these views we will sit down and prepare a report and recommendation and prepare a Draft Bill. That Act of the Parliament according to the wishes of the Kenyans says we should not give that report to the President nor to the Parliament but to the people themselves to read through and be satisfied that what we have done is what they have asked or is what they think is a good thing.

That Act says at that particular stage we should give this people two months to read through that report Draft Bill and recommendations to discuss and to debate to hold their own seminars and workshop here you might even come there and assist them to understand. We give them a whole two months that is not what the Constitution is deciding but what the law say. Then when we finish that the Act says at the end of two months we should come back to them at the Provincial level do you like it or not. Is there anything you want to change? They will tell us we will go and change the report in accordance with what they have told us.

Then we call a National Constitutional Conference, which will have about 600 people. The Kenyans said we do not trust MPs so that document should be discussed and adopted by a bigger body which will have Commissioners, MPs, and each and every district will send three people and representatives of religious organizations, women groups, trade unions this will give a group of 600 people. They will be required to discuss that and adopt or reject. If they do not agree on certain things, as I believe they will not particularly referendum then we come back to them to vote by way of referendum for example the issue of Majimbo they may not agree so we come back to the people to vote.

When we finish we again amend the report before we hand it over to the Parliament. Now we are in July we intend to finish our

taking of views on 30th July in Western Kenya and we go and sit and write a report. When we finish that report we must get two months to give to the Kenyans to study. We must get time to go back to them to take comments and to call the National referendum. In Uganda the equivalent of national referendum was estimated to take three months they ended taking sixteen months. I am sure Kenyans the way you know them they hardly agree you can be sure that in a group of 600 people they might not take a month. So people when people ask us give us a Constitution by the end of October. By the end of this month we will be remaining with three months and you expect us to do everything as I have said in those three months. Is that possible?

You see the difficulty we are in and that is why some of us dis-agree with the Chairman because the Chairman is promising you what is impossible and we are saying no tell the Kenyans the truth so that they know they are in a problem and they decide how to move forward but instead he is telling you people we have no problem we will give you the Constitution. You see where the problem is?

John Keen: I agree with you and I concur with your views and I told you from the beginning I sympathies with you because of the time limit.

Com Mutakha Kangu: The details of the Act.

John Keen: Now Parliament is the one which is responsible for this Act. You should go back to the Parliament and amend that Act. There are two things here because what I know by the time you come to the National Conference there will be a lot of disagreements you will not get any where. The National Conference ndiyo itakuwa pomoka kabisa. Certain provinces here want Majimbo others like Central Province they do not want Majimbo and so on with that kind of tag of war it will take time.

There is one big problem with our Constitution today is one man President Moi pakee yake because what he want Parliament extended so his term of office is equally extended right. That is the main problem here.

Com. Mutakha Kangu: You are just making a comment to enlighten the people but we have taken your views thank you.

Translator: *Ashe taayie ele Nyangusi kitoningo duo ninonok nyaaki taa njoo kulie.*

Com. Kavetsa Adagala: Asante sana muheshimwa it is good to hear from you. A small comment. If it was only drafting as it was done in Lancaster we would also draft in a short time but we have to involve this people that is what is taking time. Thank you very much.

Com. Keriako Tobiko: Asante sana ndugu yako.

Com. Kavetsa Adagala: Robin part of the problem in Kenya is that Kenya is not one. People do not have equal access to facilities. In order to correct that for a new Kenya we would have to put something in place. We cannot take it the way it is. We are not talking about Kenya for tomorrow alone this should take us for 50 years and over. Some people have been left behind for a 100 years and have not benefited in anything for those many years. So there is no equality or equitability so we have to bring Kenya to an equal ground and it will take time. It is very nice to talk about being Kenyans and all that but if things have not been equal I doubt.

50% of the resources have been in Nairobi pulled from rural to the center we have to devolve them to flow back to the places where they came from. So that this Institution can have freehanded Masai.

Robin Wachira: May be what I would have wanted to suggest.

Com. Kavetsa Adagala: No I understood what you said very well you wanted it to be the same and remain the way it is but

we want it to change very fundamentally.

Robin Wachira: Other than having the exaction of forest and having three thousand acres being given to a powerful individual so many other Kenyans regardless of the tribes they are from are landless. I see certain individual being privileged. Thank you okay.

Com. Keriako Tobiko: Thank you.

John Ndithuka: My names are John Ndithuka.

Translator *Eji taa John Ndithuka*

John Ndithuka: I am a student here in Masai Technical and I would wish to present my views.

Translator: *Na keisuma sii ninye tene wuei naa keeta sii ninye kuti naayieu nejo.*

John Ndithuka: I will start with security and safety of the country.

Translator: *Neimaki naa ninye security enkop.*

John Ndithuka: In our current Constitution it says that the President is the Commander in Chief of the Armed Forces in Kenya and it is his duty to ensure the security and safety of the country. I do propose that this one should not be as it is. The Commander in Chief, this should be given to the top military officers who have the technical and knowledge from the military field.

The Parliament should have a mandate to declare a state of emergency in the country by a vote of 46% of the members.

Parliament: we do meet this MP's during the campaign period and then after the election the MP is elected he just go back to Nairobi he does not come back to the constituency and meet his people. So I would propose that if the new Constitution can create a kind of mechanism where by if an MP come to the local people and promise that if you elect me I am going to provide the following services. Let the Constitution come out clearly that such person should be followed if he does not fulfill the promises he made.

Education: Technical students should be provided with higher education loans like the public university has been doing. This is the only way we can achieve the target of being industrialized because through this technical education most of the students are going to get technical skills. Most people are unable to achieve this due to lack of funds.

Executive: In the current Constitution the President is above the law meaning that he cannot be persecuted in the court of law.

He can also order one to be imprisoned without being charged in court. This is violation of human rights and so such powers should be abolished in our new Constitution.

The new Constitution should certify the qualifications of a Presidential candidate. He must be a married a person, from 35 years to 70 years and a well-educated person with a honourary degree.

Basic Rights: According to chapter five of our current Constitution the Bill of rights has guaranteed the right to life. The death penalty offered by the Kenyan court does not adhere to these rights. So I would propose that if the right is there this death penalty should be abolished from our Kenyan court.

Electoral Commission: According to our present electoral system the Chairman of the Electoral Commission is appointed by the President meaning that President is his immediate boss and he cannot do without the orders of the President. This means that this person will not go beyond what the President has told him and that proves that he cannot work effectively.

I would propose that the Parliament should set a selective committee where they could elect the Electoral Chairman and the Commissioners. Thank you.

Com. Mutakha Kangu: I do want people to think why you elect MPs and they go back to Nairobi. This is something that is very seriouse it is not just MPs. Masai's will educate there children here but the state of the economy is such that those children have to go to Nairobi that is where they can get jobs. They do not realise that effect it has to the communities in terms of accessing the services and so on. Those MPs are people who are based in Nairobi. They come to the village only when they are seeking for elections. So when you elect them they have no business of coming back to you. So what is it that we can do that will keep the educated people in the villages here?

John Ndithuka: I think we should elect a personal who is based in the village and not in Nairobi.

Com. Mutakha Kangu: You would like to elect the people who are based in the village but the tendency in our country is that our parents will toil to educate us but after that they will tell you to go to Nairobi that is where you can get a job. So the stars in the village are primary school teachers yet those villages have produced doctors, engineers, lawyers. What do we do to make the economy in the village to sustain these doctors so that they can practice their medicines in the villages to create wealth?

Richard Ogega: Mine is not a lot. Three things that should be enshrined in the Constitution. Separation of powers. It should be categorical and authority defined. Look at the Executive Legislature and the Judiciary you get the difference is very small. The Executive interfering with the Judiciary in that it is the Executive through the President who appoints judges without even the Legislature approving or something of the sort.

So I would like a situation whereby the Executive does his work independently from the Judiciary, and the Judiciary does it work independently from the Legislature?

Take some cases like Golden berg. It keeps on coming up again and again in that there are some godfather who would not want there life tampered with or political life messed up. The Constitution that is going to be written should have a very defensive line defining what the Executive should do the Judiciary and the Legislature.

From the Kenyan perspective there should be a better method of doing things e.g. tax money collected from the individual it should be accounted for. I mean a balance sheet should be drawn by the Government live alone reading the budget and stipulating what should be spend. There should be a balance sheet that is going to indicate that this much went to this and this Committee, the Investments Committee in Parliament either they are given tip to chew or they are just done away with this is because they will talk about some investments been done and that investment there are some corruption in it and the Judiciary cannot take it from that point because either the Executive have threatened Police. So the tax which people are paying should be accounted for.

The level of tax should be equitable. You pay tax to get some things you do not have to pay some tax then the money is just spend.

I would like to support the former speaker who said that MPs are mean. They are elected they go there they do not bring back what they are suppose to bring. I suggest the following to be enshrined in the Constitution. The terms of the MPs should be limited to two five year terms to ensure that this people if they do not do whatever they are suppose to within those two terms of five years then they should just go away because at the moment we have a group of MPs who claim to be representing there people and they have done little.

So by having that limitation in the Constitution then this people will be sensitive to bringing development to there people rather than enriching themselves in fact this MPs should be vetted for at least, they should be people of ethical moral up bringing. They should not elect somebody who will walk there enrich himself at the expense of the common man.

The issue of the youths: there so many youths, we live form four we go out there most of us do not make to university because the universities are few and it is very expensive. So education should be free from nursery to university.

These corporations that are being formed by the Government they should be abolished. Like the National Youth Service should be merged into either the army or the police whereby the youth if they finish there O levels they join the army for the security of the nation.

Another issue is the registration of the societies: this is so common now a days to an extend that there are cults that are coming up especially to the churches which are more or less money minded. I would like the Constitution to stipulate and limit the number of the set organizations.

Last but not least there should be a forum whereby the Constitution gives people power to question the MPs/President because they have elected them currently they cannot be questioned or answer people directly. The issue of having an Act whereby the state secrets are kept for a long time should also be abolished. Commissions being formed and items being held from the public and yet they directly affect the public. Thank you.

Com Kavetsa Adagala: Did you vote in the last election?

Richard Ogega: No I was one of the participant in the electoral process.

Com. Kavetsa Adagala: If an MP is not performing what would you like to happen? You have just said that they should go away. Nobody who just go away.

Richard Ogega: What I was suggesting is that, the Constitution should be written in such a way that an MP term should be limited to two terms.

Com. Kavetsa Adagala: So you want him to wait for five years while children are dying of malaria, while children are not going to school, while all people are not happy. We wait for those five years?

Richard Ogega: No at least for my own perspective. Law is something very difficult to understand I met limiting terms for certain individual who have been there for a long time and there is nothing that they are showing. If they go for two terms at least they will have realised the ideals and sale them to the people. If it is possible then the Speaker of the Parliament should be given power and there should be a process where by the electorates can either write down their names or present them to the Speaker to do away with that MP.

Com. Kavetsa Adagala: It is called “ Power of the Recall”. The power of the people to recall their MP. He just doesn’t go away, and you know he will come and bribe people again and go.

Richard Ogega: That is a new thing that I have learned thank you.

Com. Mutakha Kangu: How does the limiting of terms makes this people more sensitive. I think that a person will try to

behave a little better in the first term to teach to re-elect him and in the last term he knows it is the last so he will not be coming back to you for re-election and for those five years he won't care about you.

Richard Otega: That is why I suggested I mean for two terms. The current Constitution say that if you are 21 years old you can via for the Parliamentary seat that is it and you can go back for as many times as you want as long as you have money so the issue here is limiting the terms and also enshrine the power of recall.

Com. Mutakha Kangu: Okay thank you very much.

Com. Keriako Tobiko: Sasa nafikiri tumemalinza kazi yetu na langu ni kuwashukuru nyinyi kabisa kwa kuja hapa mapema na kwa wingi na kuwa watu wa nzuri.
